Best Practices Adopted
By
Shriram Alkali & Chemicals Jhagadia
To improve Energy Efficiency

Navin Jaiswal
Addl General Manager
DCM Shriram Ltd
The Company – DCM Shriram Ltd.

• DCM Shriram Limited is formed in 1990 consequent to restructuring of DCM Ltd. (founded in 1889) over 100 years of standing in Indian business

• Turn over - Company : Over 5500 Rs. /Crores (1000 Million USD)

• Shriram Alkali & Chemicals : Over 450 Rs. /Crores ( 80 Million USD)

• Company’s Business portfolio comprises of

−All Plants Certified to ISO 9001(QMS)/ 14001(EMS) & OHSAS 18001
−All locations have energy monitoring cell
Shriram Alkali & Chemicals, Jhagadia, Bharuch

- **Location**: GIDC Jhagadia, Distt. Bharuch, Gujarat, India
  large scale industrial estate specially developed by Govt. of Gujarat for “water intensive chemical industries”

- **Operating**: Since March-1996

- **Technology**: Membrane Cell Based Chlor-Alkali Plant

- **Plant/Facility**: Caustic Soda - 171000 TPA
  Captive power plant - 55 MW Coal based
Shriram Alkali & Chemicals, Jhagadia, Bharuch

An overview of the plant
Methodology

Adopted
Methodology Adopted By DCM For Energy Conservation

- Cause and Effect Study
- Brainstorming
- Findings of Energy Audit
- Study of Energy consumption pattern of equipments
- Experience / Knowledge Sharing from other group units of DCM

Energy Saving Scope

- Loss Identification
- Suggestions from employee
- Findings of Various studies

Evaluation of Saving Proposal By Technical Team

Implementation of Saving Proposal

Reduction in Energy Consumption
Key Performance Outcome
Continued Focus on Energy Efficiency Initiatives

Total Energy consumption – Th Kcal/ T of NaOH

Some case studies
Energy Conservation in Chlor-Alkali Plants

• **Cell Power**: 90-92% Contributor

  Initiatives taken at DCM for Cell power Reduction

  - Adoption of latest zero gap technology. *(India’s first ZERO Gap electrolyzer installed at DCM in March-2006)*

  - Installation of one more electrolyzer for reduced current density operation for overall power reduction.

  - Timely re-membraning & recoating of electrolyzer.

  - Improvement in brine quality for sustaining the electrolyzer efficiency
Energy Conservation in Chlor-Alkali Plants

• **Auxiliary Power (8-10% Contributor)**
  - Real challenging task.
  - Low cost solution.
  - Needs systematic improvement, dedicated team efforts and in-house modification.

**Initiatives taken at DCM for Auxiliary Power Reduction**

- Encourage innovation by motivation like Energy Conservation Award

- Installation of VFD’s for energy conservation

- Complete overhauling of plant in annual shut down for maintaining the efficiency of equipments

- Hydro-jet /Chemical cleaning of heat exchangers for better heat transfer
Monitoring and Control

- Energy Monitoring System (EMS) is installed.
- All motors (5.5 kw and more) provided with energy meters.
- For the close monitoring section wise energy consumption captured for analysis on regular basis.
- Energy consumption review on daily basis.
- Corrective actions for deviation / improvement.
- Following section wise energy consumption is measured on daily basis
  - Individual rectifier power consumption
  - Chlorine Compressor
  - Freon Compressor
  - Air Compressor & Padding Air Compressor
  - All motors having rating of 5.5 kw and more
Installation of one energy efficient Zero Gap Electrolyzer

To reduce the current density & hence reduction in power consumption one more electrolyzer (9th electrolyzer) with state of art “Zero Gap Technology” from M/s Asahi Kasei, Japan

Year Of Installation - Dec-2013

Electrical saving : 132 KWh/T

Total investment - Rs. 21 Cr
Installation of additional Air Preheater to recover heat from flue gas

- At full load capacity, the flue gases temperature at the exit of boiler was 163 to 165°C.

- This was causing energy losses due to high exit temperature of the flue gases.

- Additional sections of air preheater were designed and installed in the existing Boiler during the plant shutdown in July-2014.

**Improvement Achieved**

- Temperature of flue gases at the outlet of additional APH is in the range of 143 to 144°C at full load of Boiler.

- There is reduction in flue gas temperature by 20°C i.e. **improvement in boiler efficiency by 1.0 %**

- Investment of 1.5 Cr/Rs

- Saving: 1.4 Cr/Rs/annum
Installation of additional Air Preheater to recover heat from flue gas

Before Modification

After Modification
Anti-friction ceramic based coating applied in cooling water pumps wetted parts to reduce the friction loss hence improve in efficiency

Total investment : 5.5 Rs/Lacs
Savings : 7.9 Rs/Lacs
## Energy Conservation Initiatives

<td>26</td>
</tr>
</tbody>
</table>

**Total investment – NIL**

**Saving** - Rs 10 Lac /annum
Energy saving in lighting system

- Separate low voltage transformer is installed for lighting

- Other measures taken for further energy saving
  - Door switch installed for switching off the light is cabinet is closed.
  - Energy saving done by providing ON/OFF push button on both side door of PMCC
  - Energy saving by removing excess lighting in power plant turbine building without affecting lux level
  - Phase wise replacement of conventional fluorescent light with energy efficient LED light.

**Total Investment** : Rs 1 Lacs

**Total Saving** : Rs 2 Lacs annum

</tbody>
</table>
Way Forward …

- Expansion of caustic soda production facility and power plant with latest available technology.

- Energy Audit of plant to get more improvement opportunities.

- More focus on Latest Technology, Innovation and Skill Development.
Roll of Honor

→ 2014-2013 - “Sword of Honor” by British Safety Council, UK for best safety management system continuously for three years

→ 2011 - Sir Shriram Award for Best Managed Chlor-Alkali Plant by Alkali Manufacturer Association of India

→ 2007 - Gujarat State Safety award for achieving accident free million man hours worked

- Prashansa Patra in recognition for developing & implementing effective Management Systems Occupational safety and health for the assessment period of three years – 2002 to 2004 by NSC.

→ 2005 - Award for Unique & Innovative efforts in Energy Conservation by PCRA, Ministry of Petroleum & Natural Gas, Government of India
- Platinum award (Greentech in chemical sector for outstanding achievement in Environment Management
- Platinum award (4th Annual Greentech Safety Award) in chemical sector for outstanding achievement in Safety Management.
Roll of Honor

→ 2004
- **2nd prize in National Energy Conservation Award** in Chlor Alkali Sector by Ministry of Power, Government of India
- Award for **unique & innovative efforts in Energy conservation** by PCRA, Ministry of Petroleum & Natural Gas, Government of India
- Certificate of appreciation for achieving accident free million man hours in the year 2003 by Gujarat Safety Council
- **Platinum award** (Greentech in chemical sector for outstanding achievement in Environment Management)

→ 2003

→ 2002
- **2nd rank out of 34 Chlor-Alkali plants** in overall environmental rating of the Indian caustic-Chlorine sector by Centre for Science & Environment, New Delhi under their green rating project.
- **1st prize in National Energy Conservation Award in Chlor Alkali Sector** by Ministry of Power, Government of India.
- **Award for unique & innovative efforts in Energy conservation** by PCRA, Ministry of Petroleum & Natural Gas, Gov of India for 2002
Roll of Honor

2001 - National Energy Conservation Award in Chlor-Alkali Sector by Ministry of Power, Govt. of India for consecutive third year

- Award for unique & innovative efforts in Energy conservation by PCRA, Ministry of Petroleum & Natural Gas, Government of India for consecutive second year.

- Corporate Environment Award 2000-01 by Tata Energy Research Institute in recognition of corporate leadership efforts towards environment management and sustainable initiatives in the category of “company with turnover below Rs 100 Cr.”

2000 - National Energy Conservation Award in Chlor-Alkali Sector by Ministry of Power, Govt. of India for consecutive second year

- Two awards for unique & innovative efforts in Energy conservation by PCRA, Ministry of Petroleum & Natural Gas, Government of India

- ICMA certificate of merit for excellence in energy conservation and management

1999 - National Energy Conservation Award in Chlor-Alkali Sector by Ministry of Power, Govt. of India for consecutive second year
Our journey towards EXCELLENCE is Continual . . .
